Lab 2: VMs

Mario Ventura

Índice

- 1. VM Linux
- 2. VM Windows
- 3. Face recognition

- Crear cuenta AWS
- Entrar al panel de Lightsail
- Crear instancia
- Conectarnos a la instancia

Seleccione la ubicación de su instancia Información

Seleccione una región

Mientras más cerca se encuentre la instancia de sus usuarios, menor será la latencia de sus conexiones a la misma. Más información acerca de las regiones [2]

Londres, Zona A

¿Y con Windows?

VM Windows 10

VM Windows 10

¿Diferencias?

VM Linux vs VM Windows

- 1. Windows ofrece entorno visual, Linux solo terminal.
- 2. Windows va notablemente más lento.
- 3. Windows muestra problemas de conectividad, entre otros

La decisión final depende de las necesidades

personales del usuario

Detección y comparación facial

AWS tiene una funcionalidad llamada Amazon Rekognition.

Dos funcionalidades:

- Análisis facial
- 2. Comparación facial

MACHINE LEARNING & AI

Detect, Analyze, and Compare Faces

Learn how to use the face recognition features in Amazon Rekognition using the AWS console.

10 Minutes

Acceder a Amazon Rekognition

Detección y comparación facial
